

HI THERE!

I'm Luke (Mynus) a graphic designer based in Central Europe. I'm a versatile type, all-rounder, and a quick learner, with a passion for delivering the finest visual experience for the viewer. I care deeply about the quality of my work so as a designer I also know there's always a pixel that can be pushed closer to perfection, always ;)

QUALIFICATION!

Years of agency and freelancing experience based on a self-educating design basis. For 4 years I was remotely supporting the UI/UX department, brand and marketing team at [Gooten](#). developing ideas and delivering outputs that did maintain or bolster brand reputation. Valuable experience comes with a year of creating brand identities for all kinds of individuals and industries and helping them out by breaking through all the visual noise under the supervision of a brand strategist [Phil Pallen](#).

GOALS!

The goal is to make complicated things simple. Goal is also to do more of what makes me happy. Goal is to support the visual and verbal side of brands, companies and individuals. Goal is to build a bridge between their vision into valuable visual stories and languages.

WORK COLLECTION!

To see some of my work you can visit either my [Official portfolio](#) or you can check my [Behance profile](#) for additional projects. Occasionally take a sneak peek at my [Instagram profile](#) as an instant portfolio 😊 as you can find some goods there as well.
